world of information

ZyLAB puts you in command of boundless enterprise data

ZyLAB's industry-leading, modular information access, eDiscovery, records management, and enterprise information management technology puts you in command of boundless enterprise data in order to mitigate risk, reduce costs, investigate matters, and elicit business intelligence.

KEY ADVANTAGES

- The fastest and most complete search engine on the market
- Works with all existing storage media and devices
- Supports terabytes of data without volume charges
- Unmatched support of scanned documents, ZIPs, BMPs, e-mail attachments, and multimedia
- Non-proprietary, adaptable and extensible XML architecture
- Integrates with 3rd-party databases
- Enterprise licensing and SaaS options
- Modular, scalable implementations

Leading eDiscovery and information management

Our award-winning flagship product, ZyLAB Information Management Platform, provides clients with an affordable and scalable framework from which they can quickly capture, search, retrieve and assess the information stored in disparate formats and locations.

CAPTURE, CLASSIFY & STORE	SEARCH, BROWSE & INVESTIGATE	SHARE, COLLABORATE & DISCLOSE
<p>Assemble vast amounts of structured and unstructured data spanning 700+ formats and stored in disparate sources or databases without requiring new proprietary databases.</p>	<p>Apply robust search, retrieval, and analysis tools to navigate entire populations of collected data and efficiently locate relevant information when you need it.</p>	<p>Provide authorized users with convenient methods for reviewing culled information and preparing it for legal review, production, destruction or audits.</p>
<p>Highlights:</p> <ul style="list-style-type: none"> • Digitize and OCR paper; unite with electronic files, e-mail, wikis and multimedia from servers, local hard disks, and mail servers • Integrate with Oracle®, Microsoft® SQL®, SAP®, SharePoint®, and other existing products and databases for RMA, DMS, Workflow, Discovery, ERP, BPM, HRM, legal or financial systems, and Web search • XML-based archiving retains native file formats and provides maximum scalability and flexibility • Dynamic indexed environment refreshes as new content is added 	<p>Highlights:</p> <ul style="list-style-type: none"> • Full-text retrieval of information in nearly 400 foreign languages • Highest recall with precise filtering tools to achieve optimum search fidelity • Keyword, key field, fuzzy, wildcard, Boolean, proximity, Federated and compound file searches • Relevance ranking, hit highlighting and navigation, and data visualization tools • Text mining and pattern recognition to extract previously unknown concepts and meta data • Cull, organize and process data 	<p>Highlights:</p> <ul style="list-style-type: none"> • Monitor communications and changes via alerts and audit trails • Reduce manual burdens on records managers and document custodians • Automate review, filing, retention and disposition • Apply annotations, redactions and Bates stamps to selected materials • Publish DVDs and CDs with relevant documents and tools for later analysis • Produce files for use in litigation products like EDRM-XML, Concordance®, iCONNECT®, CaseMap®, and Summation
<p>Outcome: Fast and seamless document conversion and migration into searchable data repositories allowing uniform information management.</p>	<p>Outcome: Unequaled command of electronically stored information (ESI) allowing you to find what you seek and what you didn't know was there.</p>	<p>Outcome: Efficient information management to support goals for compliance, cost savings, productivity, and knowledge management.</p>

ZyLAB at Work in Your World

The robust ZyLAB Information Management Platform may be configured to the specific needs of corporations, law firms, law enforcement departments, and government agencies through limitless combinations of our companion modules. Several systems have been pre-configured according to the best practices for the business requirements of today.

End-to-End eDiscovery & Document Production

Business Driver: Investigative Review & Disclosure of Relevant Information

The ZyLAB eDiscovery & Production system empowers IT and legal departments to efficiently manage the most expensive and tedious elements of litigation in-house. Overall litigation costs are reduced and outside counsel is relieved of the risk of spoliation and related sanctions, unknown liabilities, and premature settlements due to the inconvenience of complex discovery activities.

The ZyLAB eDiscovery system is aligned with the Electronic Discovery Reference Model (EDRM) and enables you to:

- Test theories, extract concepts, and expose hidden connections among people and data
- Automate the identification and collection of data for preservation and legal hold
- Cull, process, code and organize information for automated first-pass review and thorough legal review
- Use robust search tools, relevance ranking, filtering, and de-duplication to streamline the review pipeline
- Redact and Bates-stamp documents and output to TIFF or 3rd-party software formats
- Administer a full web-based interface for external legal review
- Produce audit trails and reports to prove a defensible methodology was applied.

The ZyLAB eDiscovery system is used by many Fortune 500 companies and multi-national corporations worldwide. Consult the ZyLAB eDiscovery & Production brochure for more detail.

Compliance & Litigation Readiness

Business Driver: Risk Management, Records Management & Archiving

The ZyLAB Compliance & Litigation Readiness system fosters enterprise-wide corporate governance to minimize disruptions and risks from future litigation or regulatory audits. The ZyLAB Compliance system supports the creation, maintenance, and removal of millions of dynamic and static files—from board meeting minutes, to human resource records, to e-mail and multimedia, and any other content archives.

ZyLAB Compliance & Litigation Readiness enables you to:

- Administer access levels with role-based credentials
- Provide a repeatable and customized structure for document intake, categorization, check-in/out, and file declaration
- Simplify the collection and retrieval of relevant files for regulatory inquiries or legal hold
- Enforce compliance with regulations, internal procedures, filing plans and retention schedules
- Automate the disposition of electronically stored information (ESI) and prompt the destruction of the original physical records in storage.

The ZyLAB Compliance & Litigation Readiness system is fully compliant with privacy, data protection, and Freedom of Information Acts and DoD 5015.2. Some of our customers include Sara Lee®, Akzo Nobel, and the U.S. Department of Justice. Consult the ZyLAB Compliance & Litigation Readiness brochure for more detail.

Law Enforcement & Investigations

Business Driver: Security Intelligence & Exposure of Fraud

The ZyLAB Law Enforcement & Investigation system enables fraud investigators and intelligence and security professionals to analyze specific information extracted from vast volumes of confiscated printed document collections, electronic records, e-mail messages and attachments, wiretap transcripts, hand-written notes, information from social networks, and more. The end-to-end system facilitates all aspects of the process from collection, to forensic indexing, to data enrichment, to review and disclosure. Plus, the system provides automated translation of 40 languages to aid in high-tech, multi-national security threats.

ZyLAB Law Enforcement & Investigation enables you to:

- Automate the collection of huge amounts of data
- Reduce the time required to organize, review, and pinpoint the “smoking gun”
- Extract concepts and keywords from data
- Apply data visualization tools to reveal hidden connections among parties and information
- Produce reports, disclosures and excerpts for 3rd parties.

ZyLAB Law Enforcement & Investigation system clients include the FBI team investigating the Enron case, forensic accounting firms like KPMG and PricewaterhouseCoopers, the U.S. Department of Homeland Security and New Scotland Yard. Consult the ZyLAB Law Enforcement & Investigation brochure for more detail.

Infinite Semi-Custom Solutions

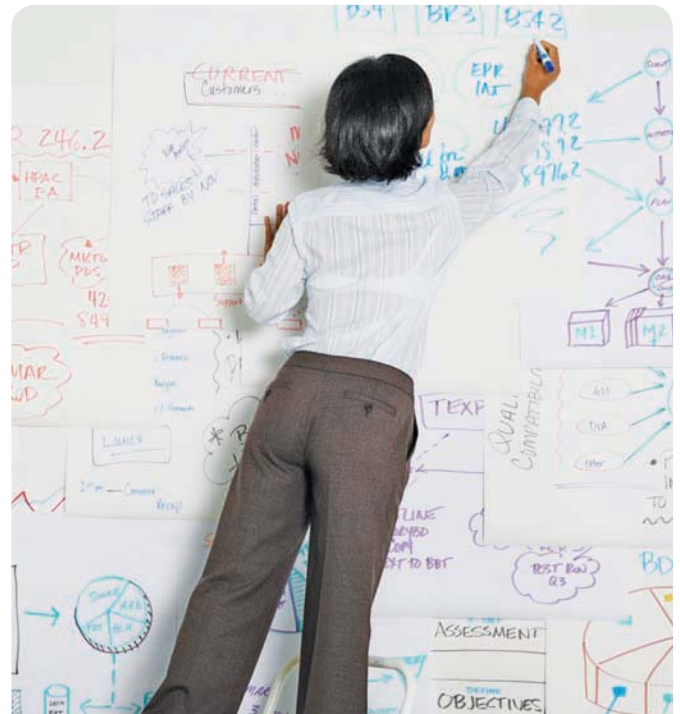

The ZyLAB Information Management Platform may be customized to meet the particular Enterprise Information Management needs of any vertical market or special project. In fact, tailored ZyLAB deployments span Communications Intelligence agencies, Print and Digital Media Archiving initiatives, and everything in between. Consult our collateral library for details on our COMINT technology, Print & Digital Media Archiving solutions, and other unique combinations of ZyLAB modules.

A Flexible, Extendible, & Scalable Environment

The XML foundation of the ZyLAB Information Management Platform eliminates the need for expensive upgrades in the future and it enables the platform to scale to meet any business requirement, such as:

- Small, standalone enterprise search installations,
- Project-based SaaS (hosted) options,
- Enterprise-wide deployments for Fortune 500 corporations and Federal, state and local governments, or
- Demanding and comprehensive data management challenges of large eDiscovery investigations.

The non-proprietary nature of ZyLAB and the myriad options for 3rd-party integrations yield maximum flexibility, remove the need for reprogramming and additional consulting, and enable installations to be completed within a matter of days. Plus, the interface is designed for quick adaptation to multiple languages.

ORIGINAL INNOVATIONS & ONGOING INGENUITY

For the past three years, the world's leading IT research and advisory company ranked ZyLAB as a "Leader" in information access solutions. We credit this prestigious honor to the combination of our vision, our ability to execute, and three decades punctuated by ZyLAB's revolutionary advancements:

- First-to-market in 1983 with full-text retrieval software for personal computers
- Pioneer of "fuzzy search" technology to overcome OCR deficiencies and spelling variations
- The only provider to support nearly 400 foreign languages

Today, ZyLAB has more than 9,000 installations supporting more than 1.7 million users in 60 countries.

"ZyLAB offers our clients, commercial and Federal alike, one of the most comprehensive solutions on the market."

~ Allan Kalkstein, Vice President and General Manager, Legal Information Management Service's Group, Lockheed Martin Aspen Systems

"ZyLAB offered us the most comprehensive solution. Other companies had specific parts of what we wanted, but nobody was able to put together everything we needed like ZyLAB."

~ Donna Baur, Records Manager & Deputy Town Clerk, Town of Jackson, Wyoming

"ZyLAB worked with us to create a system that exceeded our original vision and expectations."

~ Carol Ditzler, Head of Collection Services, US National Agriculture Library

PARTNERING WITH INDUSTRY LEADERS
